LinkedIn: https://www.linkedin.com/in/iniyaraja-i-198130203

PROFESSIONAL PROFILE

Full-Stack Developer with 3.5+ years of experience at Sardonyx Private Limited in frontend and AI-assisted application development. Strong hands-on experience in ReactJS, AngularJS, JavaScript, jQuery, HTML5, CSS3, REST API integration and responsive UI development. Developed enterprise applications including FaceR, SACP, TitanHz Cloud and XenoxBooks. Skilled in using OpenAI Codex, Claude and ChatGPT for application development, debugging and code optimization. Experienced in production support, root-cause analysis, CI/CD, application security scanning (HCL AppScan, Fortify), Nginx deployment, basic .NET debugging and Flutter mobile application maintenance and publishing. Quick to adapt to AI coding tools while reviewing, testing and taking ownership of AI-generated code before production release.

TECHNICAL SKILLS

Front-End	ReactJS, AngularJS, JavaScript (ES6+), jQuery, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design
Mobile	Flutter (Application Maintenance & New Feature Implementation), Android & iOS App Publishing
Backend & APIs	GO (Golang), C#(.NET), REST API Integration, AJAX, JSON, MVC Architecture
Database	MySQL, PostgreSQL (PGAdmin), Redis
DevOps	GitHub, Nginx, CI/CD Pipelines, TFS Hosting and Deployment
Application Security	HCL AppScan, Fortify (SAST), Vulnerability Scanning and Remediation
Code Protection	PC Guard, Code Signing, Inteli Lock
AI Development	Claude Code (hands-on, daily use), AI-assisted coding, debugging and refactoring; quick to adopt new AI coding tools

PROFESSIONAL EXPERIENCE

Full Stack Developer (AI-Assisted) | Sardonyx Technologies Pvt. Ltd. | February 2023 – August 2026

• Build and maintain backend services and REST APIs in Go (MVC pattern) with PostgreSQL, using Claude Code to speed up implementation, debugging and refactoring.
• Developed the XenoxBooks end to end, including invoice validation, search, analytics, queues, session management (Redis).
• Review, test and take ownership of all AI-generated code before release.
• Set up CI/CD pipelines, managed code in Git, GitHub and TFS, and deployed services and Nginx.
• Ran SAST scans with HCL AppScan and Fortify, fixed vulnerabilities, and applied PC Guard and code signing to production builds.
• Maintained Flutter mobile applications, implemented new features and resolved application issues.
• Supported Android and iOS application publishing through Google Play Console and Apple App Store Connect.

FaceR – AI Based Face Recognition System

AI-powered face recognition platform that captures camera images, processes them using AI, matches faces with enrolled users, and provides live monitoring, alarms, dashboards, events and notifications.

- Developed responsive UI modules using ReactJS, AngularJS, JavaScript and jQuery.
- Implemented live monitoring dashboards and event management screens.
- Integrated APIs for facial recognition and AI processing.
- Developed alarm and notification management modules.
- Resolved production issues and improved application performance.

SACP – Snappy Alarm Control Panel

Security alarm management platform for monitoring sensors, partitions, outputs and expanders with real-time notifications.

- Developed sensor, partition, output and expander mapping screens.
- Built real-time monitoring dashboards and alert modules.
- Implemented SMS and notification management features.
- Enhanced usability and fixed live production issues.

TitanHz Cloud Platform

Cloud-based platform for device activation, firmware upgrades and remote device management.

- Developed cloud management interfaces and dashboards.
- Implemented firmware upgrade and activation workflows.
- Integrated APIs for device communication and monitoring.
- Improved UI performance and user experience.

XenoxBooks (E-Invoicing and Accounting, QuickBooks-style)

QuickBooks integration platform for synchronizing invoices, credit notes, purchase invoices and purchase credits.

- Developed interfaces for QuickBooks data synchronization.
- Worked on production issue analysis and bug fixing.
- Created transaction monitoring and reporting screens.
- Integrated APIs and maintained frontend data processing.
- Enhanced application functionality and resolved defects.
- Analyzed and designed an e-invoicing and accounting application for the UAE market.
- Built the React frontend with Nginx and Go REST APIs using the MVC pattern, with PostgreSQL as the database.
- Used AI-assisted development (Claude Code) to accelerate implementation and debugging.

EDUCATION

M.Sc. Mathematics — Dharmapuram Adhinam Arts College, Mayiladuthurai | 2020–2022 | CGPA: 8.25
