INIYARAJA I

FULL-STACK DEVELOPER | ReactJS | JavaScript | Flutter | API Integration

Tamil Nadu, India • rajaiiniya1106@gmail.com • +91 88704 67054
LinkedIn: linkedin.com/in/iniyaraja-i-198130203 • GitHub: github.com/Iniyaraja-I

PROFESSIONAL SUMMARY

Full-Stack Developer with 3.5+ years of experience developing, maintaining and supporting web and mobile applications. Skilled in ReactJS, JavaScript, AngularJS, jQuery, HTML5, CSS3 and Flutter, with experience in REST API integration, database operations, production troubleshooting and application deployment. Familiar with C# and basic .NET debugging, and experienced in using AI tools such as ChatGPT, Claude and Codex to support application development.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), ReactJS, AngularJS, jQuery, Bootstrap, Tailwind CSS, Responsive Web Design, AJAX, REST API Integration
Backend: C#, Basic .NET Debugging, Production Support
Database: MySQL, PostgreSQL, SQL Server
Mobile: Flutter, Android App Deployment, iOS App Deployment, Google Play Console, Apple App Store Connect
AI & Tools: ChatGPT, Claude, OpenAI Codex, LLM, RAG, AI-Assisted Development, VS Code, Visual Studio, Postman, pgAdmin, Nginx

PROFESSIONAL EXPERIENCE

UI Client Programmer — Sardonyx Private Limited
20 February 2023 – 26 August 2026

- Developed and maintained responsive web application interfaces using ReactJS, JavaScript, AngularJS, jQuery, HTML and CSS.
- Integrated REST APIs and implemented monitoring, event, alarm, notification and reporting modules.
- Investigated production issues, performed root-cause analysis, fixed defects and supported application maintenance and releases.
- Maintained Flutter applications and supported Android and iOS application deployment.
- Worked on basic .NET debugging, application support and database-related tasks.
- Guided junior developers and supported training for new frontend team members.

SELECTED PROJECTS

FaceR — Frontend Developer
Real-time security monitoring platform using motion-detection cameras and the Tevion Engine to match enrolled individuals. Features include live camera streaming, face recognition, alarm notifications, camera/zone mapping and E-Maps. **Contribution:** UI development, API integration and bug fixing.

SACP — Full-Stack Developer
Device-integrated security alarm platform with sensor inputs/outputs and LAN/SIM alert communication to police and store owners. Includes alarm monitoring, partitions, keypads and expanders. **Contribution:** device R&D;, UI/API, Nginx, bug fixing and security remediation using Burp Suite, HCL and Fortify.

TitanHz Cloud — Full-Stack Developer
AWS-hosted platform for centralized device management, integrator-based firmware uploads, authorized device activation and remote firmware updates. **Contribution:** UI development, REST API integration, Nginx hosting and SSL integration.

Smart ASP Agent — Full-Stack Developer
QuickBooks integration to retrieve invoices, credit notes, purchase invoices and master data, store records using key-based mapping, and submit data to ASP systems with response display. **Contribution:** UI, agent creation, database management, API/Nginx integration, installation and customer support; AI-assisted development using Codex.

EDUCATION

M.Sc. Mathematics Dharmapuram Aadhinam Arts College, Mayiladuthurai	**2022** 78.35%
B.Sc. Mathematics AVC College (Autonomous), Mayiladuthurai	**2020** 57.96%

ACHIEVEMENTS & ADDITIONAL EXPERIENCE

Contributed to four real-world application projects • Guided and trained junior frontend developers • Worked on security vulnerability remediation • Applied AI tools in development workflows.
